**WORK PLAN EVALUATION (FILE NO. 86-68)**

A subsurface investigation workplan, consisting of a copy of a letter from your consultant to you describing an expansion of the on-site groundwater monitoring program and further development of hydrogeologic parameters, was submitted on January 14, 1987. Although we permitted the remedial investigation work to proceed without any delay, we requested by both letter and phone call that an amended workplan, containing a more complete description of the proposed effort, must be submitted to address a number of concerns. This workplan has not been received. Instead we have received several letters which can be described as a combination of progress reports and acknowledgement of certain components of the workplan request. We must have this material tied together in a complete, systematic workplan to determine the extent of soil and groundwater contamination onsite.

You are requested to submit the integrated workplan to us by May 24, 1987. If you have any questions please call Philip Chandler at (213) 620-2385. Thank you for your cooperation.

A handwritten signature in dark ink, appearing to read "Roy R. Sakaida".
